

# Paneltwistec AG

Higher corrosion resistance than conventional galvanisation

## Corrosion protection

**blue+** is an innovative coating system with greater corrosion resistance than conventional electrogalvanised surfaces.

In the **blue+** system, a sealant is applied to a galvanised surface and reacts with it. In this way, any weak points in the galvanisation are safely sealed and protected. The coating is free of chromium(VI) oxide, which is classified among other things as being hazardous to the environment.

Surfaces treated with **blue+** have excellent resistance to mechanical stress.

### Advantages **blue+** coating

- Greater corrosion resistance than conventional galvanisation
- Can be used in usage classes 1 and 2
- Free of chromium(VI) oxide
- Resistant to mechanical stress

## AG screw tip

The special geometry of the AG screw tip considerably reduces the screwing torque, so the screw is easier to tighten. This delivers a reduced splitting effect during screwing compared to conventional screw tips.

### Advantages AG screw tip

- Faster and easier screwing
- Reduced splitting effect
- With building-authority approval

- The larger head diameter allows for considerably higher torque and head pull-through capacity
- This makes for better use of the screw's tensile load-bearing strength

g904626	8,0 x 400	TX40	50	84 x 50

- Also suitable for fastening over-rafter insulation
- The larger head diameter allows for considerably higher torque and head pull-through capacity
- This makes for better use of the screw's tensile load-bearing strength

### Advantages AG screw tip

- Faster and easier screwing
- Reduced splitting effect
- With building-authority approval

#### Field of application for hardened stainless-steel screws:

- This steel combines the best properties of carbon steels and stainless steels. It is partially rust-resistant like an A2, but with the high mechanical values of a galvanised steel. Hardened stainless steel is not acid-resistant. It is therefore also not suitable for fastening woods that contain tannin (e.g. oak)
- Hardened stainless steel can be magnetised
- Stainless steel in accordance with DIN 10088
- The screw is suitable for use in timber-timber joints in outdoor installations and is used in garden, façade and balcony construction

945376	8,0 x 400	TX40	50	84 x 50

- Also suitable for fastening over-rafter insulation
- The larger head diameter allows for considerably higher torque and head pull-through capacity
- This makes for better use of the screw's tensile load-bearing strength

### Field of application for A4 stainless-steel screws:

- This steel is a stainless steel in accordance with the general building authority approval Z-30.3-6. Resistant to rust and acid, it is also suitable for fastening tannin-containing woods (e.g. oak) and for use in saline atmospheres
- Not suitable for use in chlorine-containing atmospheres, e.g. in indoor swimming pools
- The screw is suitable for use in timber-timber joints in outdoor installations and is used in garden, facade and balcony construction

### Field of application for hardened stainless-steel screws:

- This steel combines the best properties of carbon steels and stainless steels. It is partially rust-resistant like an A2, but with the high mechanical values of a galvanised steel. Hardened stainless steel is not acid-resistant. It is therefore also not suitable for fastening woods that contain tannin (e.g. oak).
- Hardened stainless steel can be magnetised
- Stainless steel in accordance with DIN 10088

Hobotec screws allow easy, fast and tidy fastening of timber-timber joints. These screws are especially suitable for applications with a higher risk of cracking and splitting. The new type of thread and innovative drill point ensure a clean fit and high extraction-resistance values.

#### Advantages:

- No pilot-drilling necessary
- No cracking or splitting in narrow edge areas
- No hammering of the screws thanks to Tec drive

#### Especially suitable for:

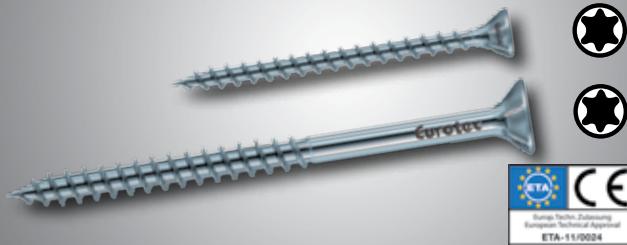

applications in the fields of model-making, staircase construction and façade construction and for carpentry, joinery and roofing work.

## Justitec

Galvanised steel, waxed

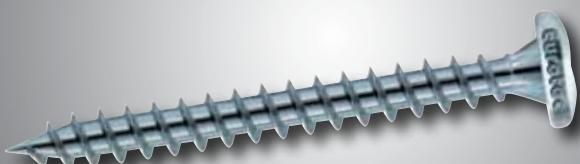

Art. no.	Dimensions (mm)	Drive	Adjustment range (mm)	PU
111804	6,0 x 60	TX 25 ●	0 - 10	200
111805	6,0 x 70	TX 25 ●	0 - 20	200
111806	6,0 x 80	TX 25 ●	0 - 30	200
111807	6,0 x 90	TX 25 ●	0 - 40	100
111808	6,0 x 100	TX 25 ●	0 - 50	100
111824	6,0 x 110	TX 25 ●	0 - 60	100
111809	6,0 x 120	TX 25 ●	0 - 70	100
905632	6,0 x 130	TX 25 ●	0 - 80	100
905633	6,0 x 145	TX 25 ●	0 - 95	100
905634	6,0 x 160	TX 25 ●	0 - 110	100

- No pilot-drilling necessary, infinitely adjustable
- No need to lay wedges underneath – work is carried out timber on timber

## Pan-head TX

chipboard screw, blue galvanised

## Pan-head TX 1000

chipboard screw, Special coated steel

### Field of application for hardened stainless-steel screws:

- This steel combines the best properties of carbon steels and stainless steels. It is partially rust-resistant like an A2 but with the high mechanical values of a galvanised steel. Hardened stainless steel is not acid-resistant. It is therefore also not suitable for fastening woods that contain tannin (e.g.: oak)
- Hardened stainless steel can be magnetised
- Stainless steel in accordance with DIN 10088
- The screw is suitable for use in timber-timber joints in outdoor installations and is used for gardens, façades and balconies
